AIRPOINT

AAP-2011-BYMG

Wireless Media Gateway

**Cut the cord: Share your ideas wirelessly
from your device to the big screen.**

No dongles, No apps

Eliminates the need for proprietary applications to be downloaded on the users' personal Apple iOS, Android and Windows 10 devices.

No need for additional dongles, HDMI nodes or break-out USB senders to be connected and disconnected each time.

Better Collaboration

Spend more time collaborating and presenting, not searching for cables or instructions.

Present with or without internet connection with seamless audio/video sync and playback.

Full 1080p HD display support.

Easy Setup

Out of the box, plug and play wireless from any device with minimal configuration.

Customizable branding and flexible mounting options.

Power via USB port of display or directly via included power adapter.

Best for most types of meeting spaces

Arrive AirPoint is a perfect solution for wireless screen sharing in huddle rooms, small to medium sized meeting rooms, training or class rooms.

Less hassle with no cables, dongles or software to set up. AirPoint connects directly to the HDMI input on a display. It can be powered by the display's USB port, or by using the included power adapter.

AirPoint works out of the box, allowing users to connect to the device' WiFi and start sharing. For an even more seamless sharing experience, AirPoint can be connected to an organization's network wirelessly or through the built-in LAN port.

Key Specifications

Embedded Arrive AirPoint™ 2.0 wireless video processing application. Native support of screen mirroring platforms: Apple Airplay, Miracast™ and Intel WiDi. Manages WiFi SSID broadcast and wireless set-up.

Full screen display over HDMI playback. Supports up to 1080p display resolution.

Built in dual band WiFi and LAN port. Low coverage radius to avoid spillovers. 802.11n capable.

Dual USB I/O for power, data and software upgrade. Digital + analog audio support.

Please refer to product specification sheet for more technical details. Design and specification subject to change without any prior notice.

Universal Wireless BYOD capable:
